THE PIERCE SEED CO., PUEBLO, COLO.

Indiana

Seeder

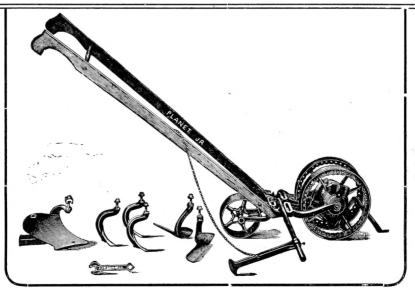

Solid Malleable Iron Frame, to which the few parts are attached, making it absolutely impossible to get out of order

from ordinary usage. Cast Iron Bevel Wheels, Sheet Steel Hopper, Heavy Tin Fan, Steel Balance; holds one-half bushel of seed; runs so easily and smoothly that the weight of the handle will run it.

THE DISTRIBUTOR IS SUPERIOR TO ALL OTHERS

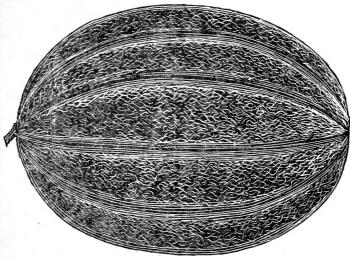

and not used on any other machine. Handsome in appearance, durable, light in weight, guaranteed to work to perfection and be first class in every respect. Price, \$1.50.

PLANET JUNIOR
No. 1

Combined Drill, Seeder, Wheel Hoe, Cultitivator and Plow, with tools as shown above, \$9.00.

Rocky Ford Cantaloupe

Nutmeg Shape, Green Flesh.

D

This cut is a good representation of the shape of this noted melon, although not full size.

It requires the very best of melon soil; is very productive, one acre having produed as high as 300 crates of marketable melons (45 melons to crate). Our stock of this variety is of the best strain and selection. When our present stock is exhausted, we will fill no more orders.

PRICE: Ounce, 15c; quarter pound, 40c; pound, \$1.00.

BEWARE OF CHEAP SEED OF THIS VARIETY.

Rocky Ford Watermelon *

One of the very best Melons for home and nearby markets. Where known it is taken in preference to all others. It is an oblong melon of good size, green skin, bright red flesh and white seeds. We have the very best seed of this variety.

Price: Ounce, 10c; 1/4 lb., 30c; 1 lb., \$1.00.

Kleckley's Sweet Watermelon *

This is without doubt one of the very best melons of recent introduction. Shaped very much like the Rocky Ford, but a larger melon; the skin is a very dark green, flesh bright red, rind very thin and hard, making it a good shipper. A fine grained melon and solid to the core.

Price: Ounce, 10c; 1/4 lb., 25c; lb., 75c.

Danish Ball Head Cabbage

Hard as Rock, Heavy as Lead.
The Greatest Weight in the Smallest Space.

This splendid variety is remarkable for its solidity, and grand keeping qualities. The heads are of medium size, and for fall and winter it is the best. The seeds we offer are the genuine DANISH BALL HEAD.

Price: Oz. 25c; ¼ lb. 70c; l lb. \$2.50.

Sugar Beets

- and -

Mangel Wurzel.

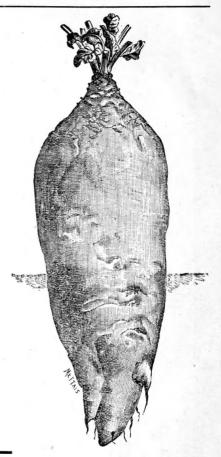

FOR STOCK FEED.

Sugar Beets and Mangel Wurzel have proven a great success among our most progressive ranchmen, and especially to the dairymen around Pueblo. Mangel Wurzel yield from 20 to 40 tons per acre. Sugar Beets from 12 to 30 tons per acre. Some prefer the sugar beets for hog feed.

CULTURE—As all Mangels require a deep soil in order to grow well, plow and subsoil from a foot to eighteen inches, and apply plenty of rich stable manure. Sow from April 10 to last of May, 4 to 5 pounds to the acre, in rows 18 inches to 2 feet apart, and thin to 18 inches in the rows. As soon as a frost occurs dig the crop. In order to be well preserved for gradual consumption during the winter, Mangel Wurzel should be heaped to a height of four to six feet on a dry sloping situation, cover lightly with straw, hay or corn stalks and enough soil to keep the covering from blowing off. As soon as this soil becomes frozen, cover all about eight or ten inches deep with more soil. By following up this gradual process of covering, all danger of heating will be obviated and the roots will keep in perfect order.

Price: Mangel Wurzel, Mammoth Long Red, per pound, 30c; 10 pound lots, per 1b., 25c.

Mangel Wurzel, Yellow Globe, per 1b., 25c.

GOLDEN TANKARD.

Valuable yellow fleshed variety, said to contain a large per cent of sugar; very productive; matures early; price, per lb., 30c.

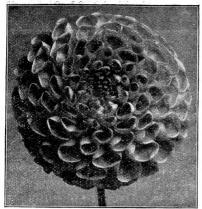

Sugar Beets-Lane's Imperial Sugar.....per lb., 30c Sugar Beets-White French Sugar.....per lb., 30c

WE MAKE SPECIAL PRICES ON LARGE LOTS.

A. D. LIVONI

Dahlias D

SHOW AND FANCY VARIETIES

CULTIVATION.... While the Dahlia is one of the easiest of all flowers to cultivate, it by no means follows that it requires no attention. In fact, no flower cultivated will give such a generous response to good cultivation as the Dahlia. Deep and thorough stirring of the soil during the early growth of the plant is indispensible to success. The Dahlia, with but few exceptions, should be given an open sunny situation for at least a portion of each day. It is a rank feeder and should be given a rich soil and kept free from grass and weeds. Cultivation should cease when the blooms appear. After this a liberal supply of water in dry weather will be all they require. Plant the bulbs two or three feet apart, according to the size and habit of the plant. The bulbs should be planted about three cr four inches below the surface, laying

the bulb on its side. Varieties growing three feet in height should be tied to stakes to prevent falling. Plant about the first of April in this latitude.

Double Varieties

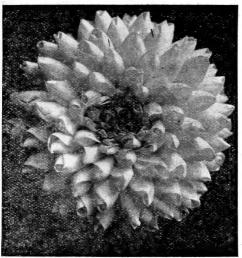

Price, 15c each; \$1.50 per dozen. Feet High Approximate	,
A. D. Livoni—Rich pink; finely formed; a very handsome flower	
Cameliaflora—Pure white; a perfectly formed flower of medium size	
Beauty-(New)-Purest white, almost as round as a ball, very free and full to center	
Miss Dodd-Purest Yellow, of exquisite form and color; a remarkably handsome flower 3	
E. A. Tunnell - Bright red, shaded and striped with pure white; produced on very long stems; no two flowers with just the same markings	
Kaiser Wilhelm—One of the grandest flowers in cultivation; of immense size and perfect form; deep yellow, tipped and shaded with cherry red4½	
The Cardinal—Deep red, fine form	
Florence Wood—It is a large, exceptionally well formed flower; bloom well above the foliage on stiff stems; color light violet purple; early and free bloomer	
Glory de Lyon-The largest white Dahlia in cultivation; almost round as a ball 3	
Henry Patrick—Pure white; this is one of the very best; flowers are very large, stems very long	
Orine Emerson—A very handsome flower, borne on long stems. Color, rich dazzling red, shaded light cherry red	
Pearl-Of immense size, with long stem; color, lavender, shaded to lilac	
Prince Bismark-Purple lake, a most pleasing color; very fine form; one of the best. 3	
Lady Midway—A very beautiful flower; white ground, shaded to pink; very large and full; a free bloomer	
* Cactus Varieties. *	

One to Three Strong Germs to Each Bulb

The Cactus Dahlias are comparatively new. They are distinguished from the ordinary type by their broad flat petals, which are sometimes twisted. They possess all the richness of color found in other types, while they surpass them in point of usefulness. Florists now use the cactus types almost exclusively for cutting and decorative purposes.

Price, 15c each; Set of 15, \$1.50.

John Elitch-One of the best red Dahlias to date, with very long stems; color, daz-	
zling red; very large and very double to the very center	5
Marchioness of Bute—A delicate soft pink; very pretty	3
Grand Mogul-Intense scarlet, variegated with pure white, frequently a solid scarlet;	
a pure cactus of large size; extra fine	4

GRAND DUKE ALEXIS

DAHLIAS--Continued

	als are bea	atifully qu	illed; cold	or is pure
	white whe	n slightly	shaded.	but over-
	spread wit	h delicate	lavende	er when
	grown in b	right sunli	ght	4

Mrs. Barnes - A beautiful primrose color; flowers well formed; a free bloomer.... 4

Lydia Dieter—A beautiful soft lavende shade; one of the most attractive color in the entire collection.

Glorisa-Long, narrow petals like a chrysanthemum; color, rich in scarlet; one of the best cactus types yet produced..... 4

Mrs. Peart—This is one of the queens among dahlias and the best of its type ever introduced; it has the appearance of a white chrysanthemum with its long pointed petals: its color is a delicate creamy white; a companion for Glorisa. 3

Earl of Pembroke-A grand dahlia, looking more like a chrysanthemum; petals very long and narrow; flowers perfectly formed; quite full to center; color rich dark purple lake... 3

Prince of Orange-A marvel of productiveness; plant nearly hidden with the large, well formed flowers; rarely a deformed flower seen; color, apricot orange and bronze blend... 3

DAHLIA ROOTS, 20 CENTS PER DOZEN EXTRA, IF BY MAIL.

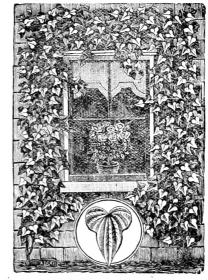

Beautiful, Fragrant Cinnamon Vines.

BEAUTIFUL LEAVES, DAINTY FLOWERS, EXQUISITE PERFUME.

The Cinnamon Vine-From the Oriental land, is one of the most charming of climbers, and will quickly surround your arbor, window or veranda with a wonderful profusion of vines covered with handsome, glossy, heart shaped leaves and sweet ty. Perfectly Hardy—Thriving everywhere, and once planted will grow for many years, and be a source of constant delight to the possessor. The Vines often run 25 to 40 feet, and when trained over and about a window or veranda, is universally admired, while its many clusters of delicate, unique white flowers send out an amount of delicious fragrance that is as truly wonderful as it is indescribable. Everyone should plant these lovely vines. No home is complete without them. They stand the hardest winter without injury, and burst forth in all their marvelous splendor very early in the spring-as fine a climber as any lover of beautiful flowers can wish.

Cinnamon Vines may also be grown indoors in winter, and make one of the most attractive of window climbers.

Price: per bulb, 10c.

Fertilizers . . and . . **Poultry** Supplies..

Lawn Fertilizer

To be used on the lawn in the spring and summer; gives immediate results; soluble; it does not disfigure the lawn like stable manure. One pound will cover about 10 square feet. Ten pounds, 40c; fifty pounds, \$1.25; 100 pounds, \$2.50.

Garden Truck Fertilizer

For garden truck and plants, none better. Use in hot beds or greenhouse, and when cabbage, celery and other plants are set out in the open ground; use about one tablespoonful to each plant when setting out, be sure to have fertilizer well mixed with soil. In hot bed and greenhouse, use about one pound to a sash (3x6 feet.) Price, 1 lb., 5c; 10 lbs., 40c; 50 lbs., \$1.25. Special prices in ton lots

Bone Meal

Used extensively for roses, grape vines and shrubs; also used for chicken feed. Price, 1 pound, 4c; 10 pounds, 30c.

POULTRY SUPPLIES

Ground Oyster Shell—Fine or coarse, 1 lb. 3c; 50 lbs., \$1.25; 100 lbs., \$2.

Nicto-Napto (Death to Lice)—The very best thing out. Per package 25c; 5 lb can, \$1.00.

China Nest Eggs-Per dozen, 30c.

Leg Bands-Per dozen, 20c and 25c.

If Sent by Mail, 16c extra per pound.

By Express or Freight at Purchaser's Expense.

FLOWER SEEDS

Flower Seeds sent by mail on receipt of price. Full culture directions on each package. In our list you will find A, B, or P to each variety. A for Annuals, which grow, bloom and die the first year from seed. B for Biennials, bloom the second year from seed, then die; though many, if sown early in the spring, will flower the first year. P for Perennials, usually bloom the second year from seed, and continue to grow and bloom for many years; some will also bloom the first year if sown early.

Ricinus, or Castor Oil Plant. A. A rapid growing foliage plant with large palm like leaves; just the thing for sub-tropical effect on lawns, and a shield for unsightly places. Package, 5c.

We Prepay Postage on Vegetables or Flower Seeds in Ounce or Packet Orders. Eight Cents Must Accompany Each Pound Order.

Flowering Sweet Peas

KATHERINE TRACY

Preparing the Soil—Select a warm, sunny place, and if possible, prepare the ground in the fall by a liberal application of well rotted manure. If your soil is adobe, use cld coarse manure, and fine manure in the spring. Place the fine manure as much in the trenches as possible.

Sowing the Seed. After you have the soil well prepared, make a trench six inches deep, sow the seed about two inches apart in the trench, cover two inches. As the vines grow. draw the earth up to them until the ground is level or slightly lower between the rows. Another way: Maketwo trenches six inches deep, from six to eight inches apart, and the double rows from eighteen inches to two feet apart, making the ground lower between the rows

A Few Hints—Prepare the ground and get the seed in as early as possible.

Have the ground moist (not soggy wet) when you sow the seed.

Do not irrigate until the plant is through the ground, sprinkle rows to keep the ground moist.

When nicely started, do not let them want for water; sprinkle the vines two or three times a week but not in the heat of the day.

A small quantity of fertilizer mixed with the ground in the bottom of the trench before planting is very beneficial and the plant appreciates mulching.

Keep all flowers cut off if you want continuous bloom. When they go to seed that ends flowers.

Do not use fresh manure.

Some of The Most Satisfactory Varieties Grown EACH 10 CENTS PER OUNCE.

America, bright blood red, striped, white.
Blanche Burpee, pure white, immense size.
Boreatton, bronze, crimson and purple.
Brilliant, bright crimson scarlet.

PUEBLO, COLORADO

Seventeenth Annual Catalogue

--OF---

The PIERCE SEED COMPANY

RELIABLE SEEDS

OUR SEEDS we have grown for us by the best growers in the country, and in such locations that have proven to be the best for certain varieties. The past season has been very hard on garden peas, but we have secured what we hope will furnish our customers with plenty; when our present stock of peas is sold, we will not be able to get any more. We import a number of our garden seeds direct from the foreign growers. We offer only such varieties as will do well in this climate.

We will be pleased to receive your orders, large or small, which will receive our prompt attention.

When in the city ask for The Pierce Seed Company's Store. You are always welcome.

TERMS: CASH WITH ORDER.

NAME AND ADDRESS—We enclose a blank Order Sheet, and extra care should be taken with the name and address.

OUR WARRANTY—A great many ask us if we warrant our seed to grow. We do not in any respect. We believe the seeds we offer are unsurpassed in quality. Experience has proven that the same seed sown under different circumstances, and by different parties, produces different results, showing that a dealer, if he warrants seeds, must put such a price on his goods as to cover a certain per cent of loss, and the guarantee does not cover the cost of the crop lost.

Among the many causes of failure are: The soil may be unfavorable to the variety sown: or, the soil may be all right, but the weather such as to destroy the germ in the seed.

We prepay postage on vegetable or flower seeds in ounce packet orders, by the pound if sent by mail, must be accompanied with eight cents for each pound so ordered.

Money must be sent by Money order, Registered Letter or Draft.

Of all seeds quoted in 100-lb. lots, 25 pounds will be furnished at the same rate per pound.

We sell packets of any seeds quoted, at 5c and 10c per packet.

Hoping to hear from you, we are,

Yours respectfully,

THE PIERCE SEED CO., PUEBLO, COLORADO.

Address, P. O. Box 495.

Summer Flowering Bulbs.

Should be put in the ground as soon as the season will permit. A light covering of old straw or litter will be a good protector from early changeable weather. If you have never tried flowering bulbs, try them this season, as they are much more satisfactory than growing flowers from seeds.

MADERIA VINE. A beautiful showy vine. 5c each.

SEE COLORED PAGE.

Double Pearl Tuberose.

Height twenty to twenty-four inches. Flower double and large, and very fragrant. Price, extra large size bulbs, 10c, three for 25c, postpaid.

Cinnamon Vine Dahlias

SEE COLORED PAGE.

Cannas

The most desirable bedding plant; we offer some of the most popular varieties. Price, 10c each, per dozen \$1.00.

AUSTRIA. Green foliage of remarkable strong growth; flowers very large, color pure yellow with light blotches of red in the throat.

AMERICA. The first red leaved Canna in the giant flowered class. Foliage fine glossy bronze almost as if varnished. Flower extra large, deep orange, flamed and striped with deeper shade; 4 to 5 feet.

DUKE OF MARBOROUGH. The darkest Canna known, a beautiful crimson maroon; fine metallic green foliage. It is entirely distinct from all others; 3 feet.

ALPHONSE BOUVIER. Green foliage, rich crimson, flower spikes, two and three on a stalk; are very large and full; 6 feet.

FLORENCE VAUGHAN. Yellow ground, thickly dotted with red; height about 3 feet.

ITALIA. Green foliage, bright red, bordered with golden yellow.

MAD. CROZY. Vermillion banded with gold; height about 4 feet.

⇔ GLADOILI ⇔

Pink, Red, Yellow, Variegated and Light Shades.
PRICE, 5 CENTS EACH: 50 CENTS PER DOZEN.

a PEONIES &

(HARDY)

OLD RED.

Flowers of a bright scarlet crimson, and quite double and globular; very early; only one bloom to the stalk; rare and fine.

EARLY ROSE.

Early pink variety; blooms right after the Old Red; the flowers are large and in clusters.

HUMEI.

A pink Peony; very full and double, very large and showy; one of the latest in bloom. It wants to be mulched heavily in order to bring its flowers to perfection.

LATE ROSE.

Similar to Early Rose, only it blooms earlier in the season. It is a fine rose-scented flower.

ALBIFLORA.

A grand old Peony; pure white; very large and fragrant; sometimes shows red streaks in center.

ALLIFLORA (White).

This is not a very large peony, but a very nice one. It has a white outside with a cream color in the center.

Price, 25c Each; Set for \$1.00.

Winter and Spring Flowering Bulbs we carry in season, such as Easter Lily, Hyacinths, Tulips, Narcissus, Chinese Lillies, Daffodils, etc.

PHLOX >

Red, Pink, White, Lavender, Strong, Healthy Roots, 10c each; \$1.00 per doz.

GOLDEN GI.OW (Hardy). (Double Rudbeckia)—One of the brightest and most showy among the hardy plants, and of the easiest culture; grows four to five feet high, producing numerous stems which are laden with double golden yellow flowers, in size and general appearance resembling a Cactus Dahlia; price 10c each; \$1.00 per dozen.

BLEEDING HEART. (Hardy)—Producing graceful sprays of heart-shaped pink and white flowers; each 25c.

CATALOGUE OF SEEDS

ASPARAGUS.

Sow in drills one foot apart, and when the plants are four or five inches high they should be thinned out so that the plants will be nine inches apart in the rows. Keep the weeds down thoroughly the first year, else they choke down the young seedlings. The deeper the soil and greater the abundance of manure that is used, the greater the crop. The experience of Colorado gardeners is that Asparagus can be cut from one to two years earlier than in the east. Less the most profitable crop grown on the market.

Columbian White Mammoth—This is a very large white Asparagus; it furnishes white shoots which stay white as long as fit for use.

Seed produces 80 to 90 per cent of white plants 10c 30c \$1.00

Conover's Colossal-A standard variety 1.0c 15c 50c

We Can Supply Asparagus Roots in Season.

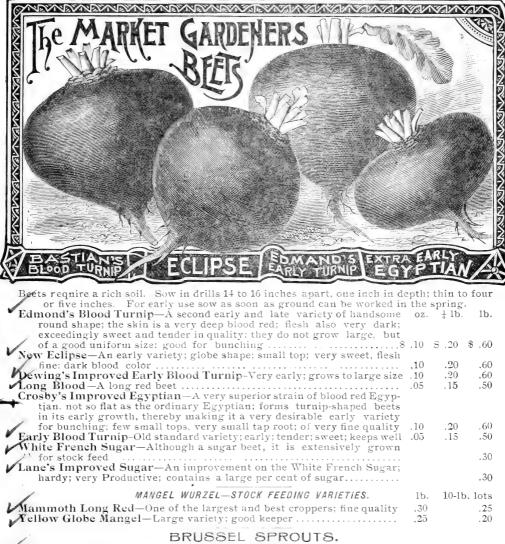

BEANS.

Select light, warm soil; plant when danger of frost is past in Spring, about two feet apart; seeds about two inches apart in drills; cover one inch deep.

CAULIFLOWER.

Requires the same treatment and culture as cabbage.

Farly Snowball Cauliflower—The Earliest. The Surest Header. The Most Profitable. The best variety for either the market or the family garden. Early Snowball Cauliflower is superior to all others: First—Because it is the earliest of all cauliflowers

as has been conclusively shown season after season. SECOND-Because under the condition of an ordinary favorable season, nearly every plant will form a perfect snow white head. THIRD-For the reason that its growing, compact habit enables one-third more to be planted on the same space of ground than can be done with any other variety. It does equally well for late planting.

Price: Package, 25c; quarter ounce, 75c; ounce, \$2.50.

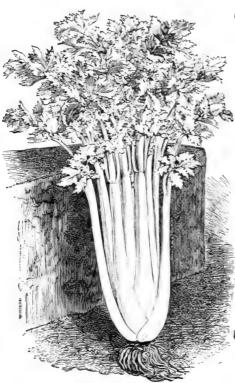

Extra Farly Dwarf Erfurt-First quality; extra early; dwarf variety: compact growth; short outside leaves.

Quarter ounce, 75c; one ounce, \$2.00

See Special Prices for Plants.

CELERY

Sow seed in hot bed; transplant four inches apart when three inches high, in finely pulverized soil: water and protect until well rooted, then transplant into rows of five or six feet apart, either on surface or well manured trenches a foot in depth; set the plants from six to eight inches apart: to blanch, draw earth around the plants from time to time, taking care not to cover top of center shoots.

WHITE PLUME CELERY

the hoe or plow, so as to keep the soil that has been squeezed against the celery in its place, the work of blanching is completed. Price: Ounce, 20c, quarter 1b., 60c; 1b., \$2.00 Golden Self-Blanching-Similar to the White Plume in its self-blanching characacteristics, but of a deep golden yellow color: very solid and of a rich nutty flavor.

White Plume Celery-The earliest, handsomest and easiest grown; and undoubtedly the earliest celery grown in Colorado. The peculiarity of this variety is that its stock and portions of its inner leaves are white, so that by closing its stalks, either by tying them them up with matting or by simply drawing the soil up against the plant and pressing it together with the hands, and again drawing up the soil with

White Walnut-Dwarf habits; solid and heavy and has a peculiar rich walnut flavor Price: Ounce, 20c, quarter pound, 50c.

Price: Ounce, 20c; quarter lb., 75c: lb , \$2.50

Golden Heart-A very solid variety; in size and habit of growth very much like Half Dwarf; has a rich, nutty flavor; when . blanched it is a yellowish white.

Price: Ounce, 20c; quarter pound, 50c.

We are Here to Stay; We Want Your Trade.

Oats, Colorado Grown	

TIMOTHY.

BLUE GRASS

Timothy is grown more extensively every year, and has proven to be one of the best crops for hay in the foothills that can be sown. Sow twenty to twenty-five pounds to the acre. Market price

BLUE GRASS

Kentucky Blue Grass, fancy cleaned, used principally for lawns, and sown in the foothills for pasture it does remarkably well. For lawns, use one pound to ten square feet; for pasture about twenty-eight pounds to the acre. Market price.

ORCHARD GRASS.

Extremely hardy; one of the earliest to start in the spring; makes good pasture and excellent hay. A great many sow Orchard Grass with Alfalfa in the foothills. Sow about twenty pounds to the acre. Market price.

RED TOP.

We carry both Clean and Fancy grades. Thrives best in low lands, making a very firm sod. Does well in Colorado, and is grown quite extensively in the foothills. Sow from eighteen to twenty pounds to the acre. Market price.

BROMUS INERMIS.

Bromus Inermis (brome grass), beardless. The introduction of this variety into the arid and semi-arid regions of the West and Northwest has given the people a pasture and meadow grass of great promise. This grass has been grown with success on the Divide east of the mountains, and should be used by all that have a shortage of water for irrigation. Last year the seed advanced very rapid, so order early. Try a few pounds Market price.

RED CLOVER.

Red Clover is used more every year, and while not as productive as Alfalfa, it is sown by a great many in orchards. Twelve to fifteen pounds to the acre. Market price.

WHITE DUTCH CLOVER.

Used with Blue Grass for lawns, makes good sheep pasture and is a fine pasture for bees; must be sown where it will have plenty of moisture. Market price.

ALFALFA, or LUCERNE CLOVER.

A valuable forage plant, and is becoming more extensively used as its worth is known. It requires a rich deep soil. The sun must have free access to Alfalfa, and the ground must be rolling to enable the water to pass off readily. A wet underground is fatal to the plant. A great many sow in connection with oats. The latter should be sowed first and harrowed in, and then sow from twenty to twenty-five pounds to the acre of Alfalfa seed, and roll the ground well. It is best when cut in bloom. It will not shed rain like other hay, and must be either stored in sheds or covered with canvas. After being cut, Alfalfa should lie until it wilts, and then cured in the cock, else the leaves become dry, crumble off, and the best part of the crop is lost. It is an all round feed for all kinds of stock. Alfalfa pasture is the very best for all kinds of stock. Market price

BARLEY.

Hulless and Beardless—It is very productive and does equally as well in high and low altitudes. The straw is of good length and strong, the heads look very much like wheat. This is not a brewing barley, but is used for feeding stock. Our seed is Colorado grown. Market price.

FIELD CORN.

(Colorado Grown)

Our Field Corn we have grown for us in Pueblo county, and we find that it does much better than corn shipped from the east, so order early.

White Australian Corn—It is an early flint corn, used by a great many for roasting ears. For those who have no water for irrigation, this is one of the best varieties. Very fine for hominy.

White Dent—This is a very fine white corn and preferred by some to the Yellow Dent. Market price,

Yellow Dent—(Mountain grown seed)—This variety we have sold for the past few years in small quantities, not being able to secure the seed in quantities enough to justify quoting in our catalogue. We will have a small surplus to offer this season at market price. This is a very productive corn, more suitable to the foothills and mountain districts, and thoroughly acclimated.

"Fuller's" Yellow Dent—This seed has been grown and improved by Mr. Fuller for a number of years, until it is one of the best strains for Colorado. It received first prize at the state fair last fall. We have secured Mr. Fuller's crop of seed and offer it at market price. If you grow corn, you should try this variety.

Bloody Butcher or Calico—We have a small quantity of this variety for sale this season. Market price.

Bee Hives and Bee Fixtures.

POP CORN.

White Rice Pop Corn—One of the very best varieties grown; a sure cropper and always finds ready sale. Market price.

Que n's Golden—This is a very fine pop corn; a delicate golden yellow; pops out white and large; is very tender. Pound 10c.

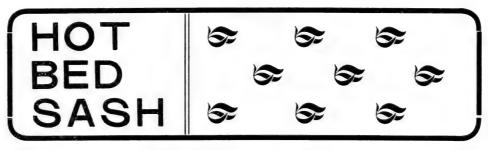

RUSSIAN SUNFLOWER.

Raised extensively for chicken feed; does well in low spots. Pound 15c.

BUCKWHEAT.

Japanese—(New)—The kernels of this new Buckwheat are nearly twice as large as the common kind; it branches more and need not be sown as thickly. It is a very heavy cropper and less apt to blight than other varieties. Market price.

Silver Hulled-Market price.

THE PIERCE SEED COMPANY.

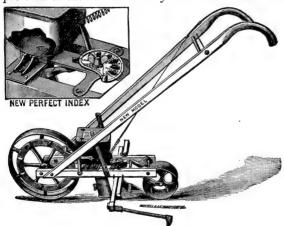

Diamond Double-Wheel Garden Cultivator

It has a new device for expanding and enclosing, which permits the operator to set the machine instantly to any desired width; it is furnished with six cultivators, two furrowers and two cutting knives. Price complete, \$5.00. Weight, 30 pounds.

New Model Seed Drill

TRY THE LATEST AND BEST

ITS FEATURES: Regulation of Discharge-Drills of similar construction are usually provided with a series of holes of various sizes, through which the seed is passed, which of course do not always give an opening of exact required. The operator is usually told, in substance, that "if one hole doesn't suit, try another." This adjustment in the Model is accomplished in a very simple and effective manner by use of a slide with a pea shaped opening passing un-

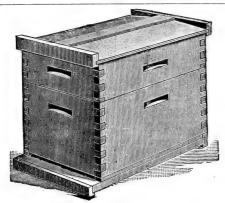

der the bottom of the seed reservoir, which is provided with a perforation of similar shape in a reversed position. This slide can be instantly adjusted to the size indicated by the index, or to a hair breadth variation between-a vital point in a perfect seed drill. The Index, or Indicator—is plain, convenient and reliable It is placed in open sight immediately under the eye of the operator and can be quickly adjusted to the slightest variation desired. As the names of the principal seeds are plainly shown on the Index itself, it is not necessary to refer

to any table of reference. Cut-off-The flow of seeds can be instantly stopped by a swinging cut-off, conveniently operated by a cord and ring on handles. Marker—Is simple, easily adjusted and firmly held. Broad Wheel—The main wheel is of large size and unusual width, preventing its sinking into soft dirt. Covering Roller-It is attached by swinging frame, enabling the operator to roll lightly or otherwise, by varying the pressure on the handles. Opening Plow-Is of steel, adjustable in depth. Each drill crated and carefully packed for shipment. Packed weight about 40 pounds. Price \$8 00.

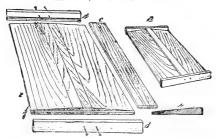

25c cents each For setting out plants, 25c

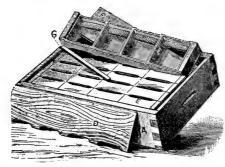

DOVETAILED HIVE.

HIVE BOTTOM.

HIGGINSVILLE COVER.

DOVETAILED SUPER.

<u>THE</u> DOVETAILED

<u>HIVE</u>

The standard hive, eight frame and $1\frac{1}{2}$ stories. The body consists of a plain box, $18\frac{1}{4}$ inches long, $12\frac{1}{8}$ inches wide and $9\frac{1}{2}$ inches inside measure, made of $\frac{1}{8}$ lumber and dovetailed at the corner. It has eight self-spacing Hoffman brood frames, metal rabbits and division board.

The super consists of a box, one-half as deep as the hive, which have for their bottom pattern slats, cut the same size and shape as the sections; wood separator and nails go with this hive.

BEE FIXTURES

ALLEY'S QUEEN AND DRONE TRAP.

This will automatically catch and cage the drones in an apartment by themselves. They can then be carried to another apiary, or be destroyed, as circumstances require. The trap will also catch the queen when a swarm issues, and hold her confined until the apiarist can give her his attention. As she cannot get away, the bees will in all likelihood return to the hive. Or if you happen to be on hand when the swarm comes out, the trap with the queen can be placed among the flying bees. The latter will probably cluster about the queen and they may then be hived. Price 50 cents; by mail, 15 cents each extra.

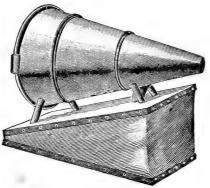

SPUR WIRE-IMBEDDER

This is a little tool like a tracing wheel, with the teeth set in Such 2 way as to Straddle the wire while it is in the act of imbedding. Price 15 cents; by mail, 18 cents.

DAISY FOUNDATION ROLLER.

A very neat little tool for fastening the foundation to the top bar. Price 15 cents. By mail 18 cents.

THE CLARK SMOKER.

This is a cold blast smoker; it is well made, of good size, cheap and serviceable Price, 50c.

The Bingham Smoke Conqueror.

This smoker has long since been recognized as one of the leading smokers in the market, and has received the hearty endorsement of many of the most prominent bee keepers. It is well made, has many excellent qualities, and is as near a perfect article as can be had for the money. Price, \$1.25

CORNEIL SMOKER.—Price \$1.00; by mail, add 20 cents each for all smokers.

BEE FIXTURES

THE PORTER BEE-ESCAPE.

No apiarist can afford to be without bee escapes more than he can afford to be without a bee smoker. In taking off honey it is the greatest labor saving device that has been introduced in late years. It avoids shaking heavy supers to get the bees out, does away with the necessity of smoking them, and the uncapping of honey attendant upon such a procedure;

there is no danger of receiving a single sting, and no danger of robbers. All that is necessary is to slip an escape board between the super and brood chamber (say toward night) on each of the colonies from which you desire to remove the honey. The next morning you take supers off the hives, practically free of bees, without disturbing the colony below, and in fact, without using any smoke.

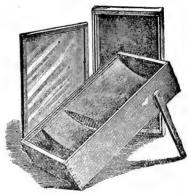

Price, 20 cents each; \$2.25 per dozen, postpaid.

Price of boards to be used with the above escape, to fit any of our regular hives; Single board, nailed, 15 cents.

Ten or more, nailed, each, 12 cents; ten or more, flat, each, 10c.

Doolittle's Solar Wax Extractor.

Better than all artificial heat devices is a solar wax extractor. A good one will more than pay for itself in one season. Bits of wax and small chunks of comb, that invariably accumulate while working with bees, and are ordinarily thrown away, will be made to yield a profit, for it is no trouble to throw them into this extractor on your way to and fro through the apiary. Then, too, wax melted by the sun's ray's will bring a higher price, for the action of these rays is to bleach as well as to melt it, and you will find it of a beautiful yellow color when cold. Price, each, \$4.00.

Parker's Machine for Fastening Starters in Section Boxes.

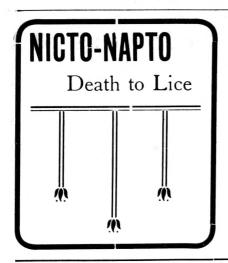

With a little practice, the machine can be made to work very satisfactory. Price, 25 cts. for our 4½ x4½ sections; by mail 40 cts.
